"Training Management System (TMS)"

Presentation by Moreno Joel D.

BACKGROUND

Many companies and schools still use manual methods (like spreadsheets or emails) to manage training programs. This leads to wasted time, poor tracking, and inconsistent learning.

The **Training Management System (TMS)** solves this by automating training schedules, progress tracking, and certification. It provides an organized, digital way to manage employee and student development.

PROBLEM STATEMENT

Most companies and schools still manage training manually—using spreadsheets, emails, or paper records. This causes:

Wasted time – Scheduling and tracking training takes too much effort.

Poor visibility – Managers can't easily check who completed training.

Compliance risks – Hard to prove employees/students finished required courses.

No central system – Trainers and learners lack a shared platform.

This project will replace outdated methods with an **automated, easy-to-use Training Management System (TMS).**

OBJECTIVES

General Objective

To create an automated system that makes training management easier for organizations and schools.

Specific Objectives

1.Track progress in real-time – See who completed training instantly.

2.Ensure compliance – Automatically report on required courses.

3.Simplify assessments & certificates – Online tests with auto-generated certificates.

4.Reduce admin work – Less paperwork, more efficiency.

SCOPE & LIMITATIONS

What the System Does (Scope)

✓ Create & manage courses – Upload materials, set deadlines.

✓ Track enrollments & attendance – See who joined/completed training.

✓ Online quizzes & certificates – Auto-generate proof of completion.

✓ Send reminders – Notify users about deadlines.

✓ Generate reports – Compliance, progress, and performance data.

What the System Doesn’t Do (Limitations)

❌ No built-in video training – Supports links to Zoom/Teams instead.

❌ Internal use only – Not for public courses.

❌ Online-only – Requires internet (no offline access).

SIGNIFICANCE OF THE STUDY

For Companies & Schools:

Saves time – No more manual tracking with spreadsheets.

Better compliance – Automatic reports for required training.

Cost-effective – Less paperwork, more efficient training.

For Employees & Students:

Easy access – Take courses anytime, track progress.

Instant certificates – Get proof of completion automatically.

For Admins & Trainers:

All-in-one system – Schedule, track, and manage in one place.

Real-time updates – See who’s finished training instantly.

SYSTEM FEATURES

Key Features

1.User Roles – Admins, Trainers, and Student get the right access.

2.Course Management – Easily create and assign training programs.

3.Online Tests – Take quizzes and get instant certificates.

4..Smart Dashboard – View reports and compliance status at a glance.

TARGET USERS

Who Uses It

HR & Managers

- Schedule trainings
- Track progress
- Get compliance reports

Employees & Students

- Take courses online
- Complete quizzes
- Earn certificates

Executives

- View training analytics
- Check compliance status

THANK YOU
